

Salix®

Dry Mouth (Xerostomia) Affects 3 out of 10 Adults

What is Dry Mouth?

Dry mouth, also termed “Xerostomia” is the condition of not having enough saliva to keep your mouth comfortable with moisture.

Symptoms Include:

- a sticky, uncomfortable feeling in the mouth
- difficulty chewing, swallowing, speaking
- decrease in taste
- mouth sores
- poor digestion

What Causes Dry Mouth?

- aging due to metabolic changes
- side effects of hundreds of prescription and non-prescription drugs
- certain diseases such as Sjögren’s syndrome, Lupus, Parkinson's, Diabetes, HIV/AIDS
- medical treatments such as radiation and chemotherapy
- talking for long periods of time, snoring, exposure to dust, paints, and irritants.

Available in:

120 Lozenge
Size Packages

Dry Mouth Can Cause

- enamel erosion
- tooth loosening
- gum disease
- bad breath
- irritation from dentures
- difficulty eating resulting in poor nutrition
- sleep disruption

What's Been Offered Until Now?

- candy/sweets (which promote tooth decay and add needless sugars and extra calories)
- drinking excessively (which does not help dry mouth)
- using saliva sprays and gels (which are awkward and attention drawing)

Finally the relief you've been waiting for is now available in a convenient lozenge!

Salix® the Saliva Stimulating Lozenge...

For refreshing, immediate and long lasting relief... Salix®!
Comfort for dry mouth sufferers... Salix®!

Salix®, the wondrous lozenge:

- affordable

The Importance of Saliva

- Essential for chewing, digestion, speech articulation and taste
- needed for healthy gums and teeth as well as for first line defense against infectious attacks.

The Solution!

Salix®, the Saliva Stimulating Lozenge which:

- enhances the production of natural saliva
- restores natural levels of moisture
- provides instant relief of dry mouth

Read what users of Salix® say...

I was introduced to Salix® Saliva Tablets by a dentist in January of 1999...

Had I known of these years ago, I would today still have a full set of teeth!

Medications taken over the past twelve years continually dried my mouth out... I could get no saliva at all... it was difficult to eat also because saliva is needed to begin the digestive process.

K.S., San Francisco, California

Your Salix® tablets have literally changed my life! About five years ago I was diagnosed as having primary Sjögrens syndrome... I tried all sorts of artificial saliva sprays, none of which helped very much. Then I read about your Salix® tablets. Now I wonder how I ever got along without them. I like Salix® tablets because they are not sweet and have only a mild acid flavor that stimulates saliva in my mouth. They work almost like magic. Also I like the fact that they are tiny tablets. I can suck one when talking to friends without it being noticeable. Thank you for a great product!

J.W., Durham, North Carolina

I have been using your product Salix® for two years now having searched for some time for something to to relieve dry mouth as a result of neck surgery, chemotherapy and radiation. Nothing that I tried came close to the wonderful results obtained from your pleasant tasting and effective lozenges. Thank you for helping me once again enjoy talking, eating and swallowing.

B.J.S., St. Claire Shores, Michigan

I am a three-and-a-half-year survivor of basal tongue and neck cancer. Following radical neck surgery and forty radiation treatments, I have been left with an extremely dry-mouth condition. I had tried every remedy known to me for this condition when a friend who had suffered similar cancer gave me some Salix® lozenges. To my amazement, the Salix® greatly relieved the dry-mouth problem, and I have been taking Salix as needed for over three years. I am deeply grateful to EuroHealth® for producing a product that helps an extremely unpleasant condition.

Thank You

H.E.R., St Petersburg, Florida

Hear what dentists who witness the effects of dry mouth say...

I have an especially personal experience to report with Salix®. My mother has been experiencing Sjögren's syndrome symptoms over the last two years. She has had a particularly tough time with dry mouth symptoms. She was very concerned since she developed some caries and her sense of taste was declining. I was on the lookout for some relief when I read about your product in a trade journal. The report was good so I ordered a supply immediately for her use. Well, she has had nothing but good experiences with Salix® over the last three months. She uses from 5-8 tablets per day. She has increased saliva flow and her food has taste again. Thank you for your product and for adding to the quality of life of the dearest woman I know.

R.E., D.D.S., Summerville South Carolina

As a dentist I had seen several patients with the problem of dry mouth. One patient in particular stands out. We had tried everything that the American Dental Association recommended for fifteen years to no avail. Through his physician, this patient was introduced to Salix Lozenges and he swears by your product.

C.W.C., D.D.S., Beckley, West Virginia

Salix® is a fabulous new discovery in my practice. I find patients are more likely to purchase this pleasant tasting lozenge more readily than asking me for a prescription.

D.O.H., D.D.S., Houston, Texas
